STRATA  **SHIELD**

A helping
hand for the
real thing

NEW
EASY CLEAN
PAVING

A UNIQUE PROTECTIVE
TREATMENT DESIGNED
TO IMPREGNATE
NATURAL STONE.

USING NATURAL STONE FROM STRATA
THAT INCORPORATES STRATA SHIELD
MEANS SURFACES ARE EASIER TO
MAINTAIN AND KEEP CLEAN.

Why use man-made imitations when your outside room can benefit from the real thing. Natural stone is a time tested material used all over the world in beautiful buildings and will stand the test of time.

Strata shield gives nature a helping hand, and is the a 21st century technology that enhances the long term performance of natural stone paving and interiors.

- Strata Shield will optimize the surface performance of natural stone such as sandstone and limestone by reducing the porosity of the stone and consequently improve its technical performance.
- Strata Shield will repel and protect against stains such as oil and alcohol, and help the removal of surface residues that can occur over time on hard landscape applications such as from algae, grime and dirt.
- Strata Shield is an innovative, factory applied treatment that will provide a protective barrier for approximately 5 years, and is designed to complement the requirements of external lifestyle and leisure activities.
- Strata shield is a unique water based impregnator that is UV resistant and protects against water, oil and grease.

NOTE: to keep surfaces clean regular maintenance should still be carried out. This can be achieved through bucket applied water and mop with a preparatory cleaning agent, then lightly washed with a hose after 20-13 minutes. Aggressive power washing or the use of acids and domestic detergents is not recommended.

Strata Stones are the only UK supplier
with an audited and verified supply chain
of quality Indian stone on the
Ethical Stone Register.

Ethical Stone Register certification means:

- We care about the environment
- We care about the quality of our products
- We do not compromise on Health & Safety
- We care about our employees & accept NO child labour

Because we provide the UK's only vertically integrated
supply chain from the quarry to our customers.
